

Algo Control Tower

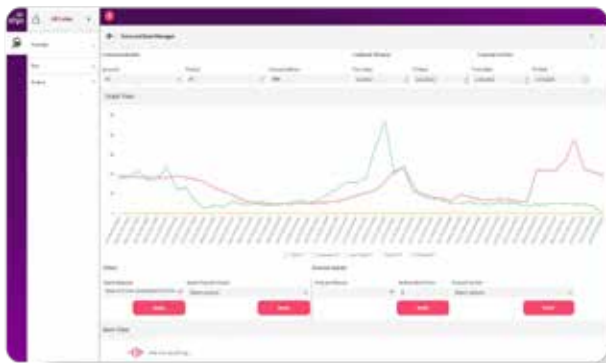

Algo's Control Tower solution integrates supply chain data from multiple sources into a single, intuitive, interactive, and visually rich interface that enables everyone in the organization to always see the most up-to-date information—the single source of truth.

Insights Across Your Supply Chain

Unified, Cross-Functional Visibility

Monitor your inventory and demand across all channels and locations with the most up-to-date information at all times in a single place; eliminate the “versioning” of data caused by manual spreadsheets and use Algo ABI's single version of truth to focus your time and effort where it truly matters—making decisions.

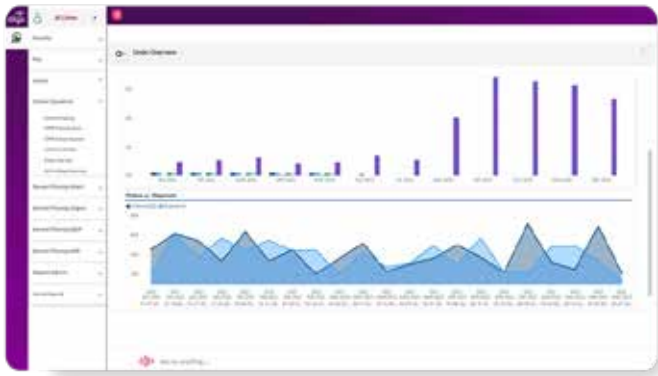

Key Measure Callouts

Keep track of the most important aspects of your business at a glance in real time, monitor changes in performance, or compare budgets vs actuals.

Granular Data Views

Seamlessly move from high-level trends to their underlying causes to take action; Algo provides easy access to the most granular levels of your data through rich and intuitive visuals allowing users to rapidly explore and discover the top contributors for each challenge or opportunity.

Advanced Multilevel Filtering

View the precise cross-section of business information you need, with a wide range of filters and search criteria to slice and dice your supply chain at your fingertips.

Smart Workflow Integration

Intelligently unify omnichannel visibility with agile supply chain control with ABI acting as the foundational component of your supply chain management toolset. It works seamlessly with Algo's other supply chain planning solutions, as well as with third-party applications, enabling you to rapidly move from insight to action.

Empower Your Supply Chain with Complete Visibility

Algo is uniquely positioned to help you navigate your supply chain journey by providing you a consolidated, bird's eye view of the entire chain. Get first-hand experience of Algo's Control Tower to see how you can reach new heights of agility, resilience, reliability, and responsiveness.
